User Manual
TWO-WAY RADIO
Model name:KG-UV8D
Brand name:WOUXUN
FCC ID:WVTWOUXUN10

Thanks for buying the  Wouxun receiver.

This receiver offers latest design enhanced features, solid performances and easy accessibility. We believe you will be pleased with the high quality and reliable features for all your communication needs.

READ THIS IMPORTANT INFORMATION ON THE SAFE AND EFFICIENT OPERATION BEFORE USING

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Unpacking and Checking the Equipment

Carefully unpack the receiver. We recommend that you identify the items in the following table before discarding the packing material. If any item is missed or has been damaged during shipment, please notify your **Quouuxun** dealer.

Installing before use

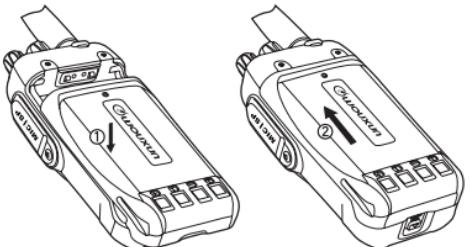

■ Install / remove battelpack

The battelpack is not fully charged before leaving factory. Please charge it before use.

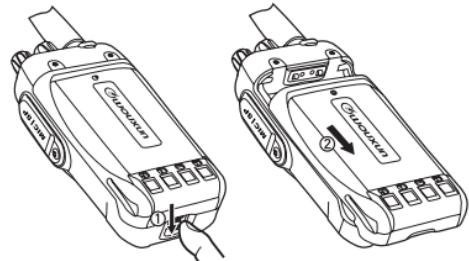

NOTE

- » Do not shortcircuit the terminals or put the battelpack into fire.
- » Do not try to remove the case from the battelpack.

1. Please aim the battelpack at the back of the receiver, and then push up and press down the battelpack to lock the release latch. (PIC1)
2. If you want to remove the battelpack, push down the release latch, and the battelpack will be released from the receiver. (PIC2)

Getting Started

Description of Features

1. Duplex Repeater (VHF to UHF or UHF to VHF)
2. Duplex Work Mode
3. Dual Receiving
4. Large Colorful Screen
5. Frequency Range
144-148&420-520MHz
6. Dual Display
Dual Band Display on Large Screen, Two Independent Operation System
7. UHF/VHF or VHF/UHF Cross-Band Repeater
8. 999 Memory Channels
9. QT/DQT Encoding/Decoding, QT/DQT Scan
10. VOX
11. Multi Definition for Sidekeys
12. Incoming Message Display
13. Caller ID display

- 14. DTMF Encoding&Decoding
- 15. All Calls, Group Calls And Selective Calls
- 16. SOS Function
- 17. Priority Scan Function
- 18. Remote Alarm
- 19. Voice Guide:Chinese/English
- 20. Chinese/English Screen Display
- 21. Bright Flashlight Illumination
- 22. Reverse Frequency
- 23. Stopwatch

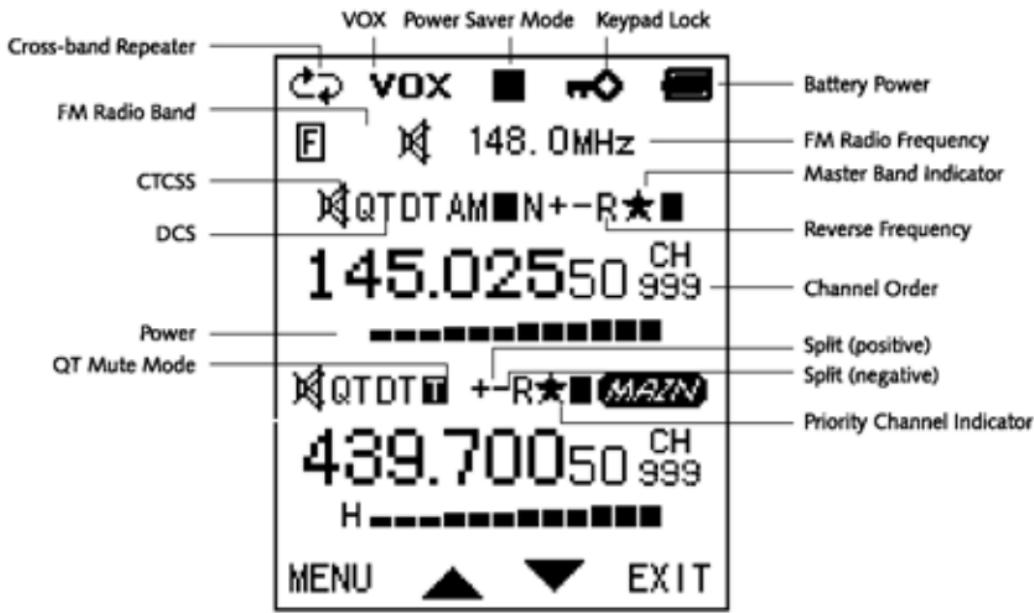

Specifications

Intergration		Receiving	bandwidth
Frequency Range	144-148MHz & 420-450MHz	Adjacent Channel Selectivity	≤60dB
Step	5KHz / 6.25KHz / 10KHz / 12.5KHz	Inter Modulation	≤60dB
Channel Number	999	Spurious Response	≤70dB
Work Mode	F2D / F3E	Audio Response	+1~3dB(0.3~2.55KHz)
Operating Temperature	-20°C or 40°C	Signal to Noise Ratio	>40dB
Antenna Resistance	50Ω	Audio Distortion	<5%
Voltage	7.4VDC	Sensitivity	UHF/VHF:0.25µV(12dB SINAD)
Weight	490g		
Size	124.5x 61.49 x 33.88 (mm)		

Description

LCD Display

There are various indicators display on the screen when powering on. Please refer the below table to learn what the indicators stand for accordingly.

Flashlight

Antenna

Receiving LED (Green)

Up/Down Keys

Getting Started

Sidekey PF1: Selective Call/Sub-frequency Receiving Key

PTT (Push-to Talk) Key

Sidekey PF2: Monitor (Long Press)
Flashlight (Short Press)

Sidekey PF3: Scan/Keypad Backlight
/Remote Alarm/SOS/FM Radio

Description of Functions

Multi Work Modes

- Normal receiver's communication mode
- Directional cross-band repeater mode or two way cross-band repeater mode

Note: Work modes can be switched via **RPT** key.

- There are A and B areas on the LCD screen to display two bands' status. The master band is with a sign "MAIN" on the top right. This is an important sign, since all the below operation instruction are for the master band. The band without this sign is called "Sub-band".
- Please set the band that you want to program any specifications into as the master band firstly.
- Some functions are not allowed to be used under directional cross-band repeater or two way cross-band repeater mode.

Basic operation

■ Quick Search

Short press or key to search the desired function/parameter during your setting, while long press to quick search.

■ DTMF encoding

This receiver has DTMF encoding. By pressing the right number key on transmitting you can choose

Description of Functions

the right DTMF tone which you want to TX. Number key and corresponding DTMF encoding are as follows:

A	B	C	D
1	2	3	*
4	5	6	0
7	8	9	#

Setting Reverse Frequency Function

When the reverse frequency function is activated, the receiving frequencies can be exchanged. And the CTCSS/DCS encoding and decoding can also be exchanged.

How to operate reverse frequency function:

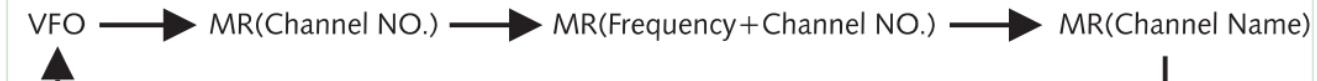

In standby mode, long press ***SCAN** to turn on the reverse frequency function; long press ***SCAN** again to turn off.

Working Mode Switch

Two work modes:VFO(Frequency) mode and MR(Channel) mode. Three different display manners for MR mode.

A. Channel NO. B. Frequency+Channel NO. C. Channel Name

VFO/MR(Frequency/Channel switch) switch is indicated as following:

When you set password for switching work mode, press **MENU**, LCD screen display [-----], please input the correct password and press **MENU**. If inputting the wrong password, the work mode switch can not be workable.

When the password is made up of full "ZERO", the work mode switch does not require password.

Wire Clone Function

Using wireclone	1.Installing the battery for source receiver and target receiver . 2.Powering on target receiver . 3.Press PF3 of source receiver . , and power on at the same time. 4.Red LED of the source radio flashes, the cloning activates	LED is flashing red during cloning. LED goes out in case of successful cloning. LED glows continuous red in case of cloning failure.
	Target receiver .	Green indicator is flashing during cloning. Indicator is off when completing cloning.

Description of Functions

How to use the intelligent charger

When the battery power is low, the receiver will activate voice guide, and prompt "Di" in every 5 seconds.

1. Insert the AC plug into outlet (AC:90-240V), the charger indicator flashes once. That means the charging is in standby.
2. Insert the battery into the charger, the RED indicator continuously flashes. That means the charging is on the progress.

While the GREEN indicator continuously flashes. That means the charging is complete.

NOTE

- » When inserting the exhausted battery into the charger, it will pre-charge the battery in trickling mode, the RED light of charger flashes and lasts 10-20 minutes, then start normal charger with RED light keeping on, it will turn to GREEN when it is fully charged.
- » Trickling charge the exhausted battery is to protect the lithium-ion battery.

46 Scan channel Group NO. of B Area	 	 Press ▲ or ▼ key Select parameter		 

How to Operate

Step Frequency (STEP) ---- MENU 1

In standby, press **[MENU]** + **1 ↗**, the screen displays **STEP⁴⁹**.
 Press **[MENU]** to enter, press **[▲] / [▼]** to select the desired step, then press **[key]** to confirm, finally press **[EXIT]** to return to standby.

The frequency steps selectable for this receiver are as follows:

5.00KHz, 6.25KHz, 10.00KHz, 12.50KHz

Squelch Level (SQL-LE) ---- MENU 2

Squelch level is about when the signal is strong enough to turn on the squelch function, and when it is weak enough to turn off. You may hear the voice from the loudspeaker when turning ON the squelch and receiving the same signal from other transceivers. Higher level makes it harder to receive the weak signals, while lower level will be interfered by noises and/or unwanted signals.

In standby, press **[MENU]** + **2 ↗**, the screen displays **SQL-LE⁵²**.
 Press **[MENU]** to enter, press **[▲] / [▼]** to select the desired squelch level, then press **[key]** to confirm, finally press **[EXIT]** to return to standby.

How to Operate

NOTE !

» The squelch level for this receiver has 0-9 levels selectable, and level 0 means turn off the squelch function. The higher level of the squelch is set, the stronger receiving signal is needed.

Power Saver Mode (SAVE) --- MENU 3

When the power saver function is ON, the receiver circuit will be cut off for a moment, and then re-activate to detect the signals for a while, in order to reduce the battery capacity consumption.

In standby, press **MENU + 3 SAVE**, the screen displays 

Press **MENU** to enter, it shows 'ON', press **▲ / ▼** to select turn ON/OFF the power saver funtion.

Press **MENU** to confirm, and then press **EXIT** to return to standby.

Prompt settings (ROGER) --- Menu 5

When the receiver is standby, press the **MENU + 5 ROGER** keys and the screen will display:

Press the key to access the menu, and after pressing the **▲ / ▼** keys to choose the required prompt mode, press the **MENU** key to to confirm, or the **EXIT** key to return to standby.

The receiver features 4 kinds of prompt: BOT, EOT, BOTH and OFF .

Time-out Timer (TOT) --- MENU 6

This receiver can be set in 60 levels with 15 seconds each, between 15 and 900 seconds.

In standby, press **MENU + 6 TOT**, the screen displays 

Press **MENU** to enter, press **▲ / ▼** to select the desired timer level, then press **MENU** to confirm, finally press **EXIT** to return to standby.

VOX (VOX) --- MENU 7

In standby, press **menu** + **7vox**, the screen displays 

Press **menu** to enter, press **▲** / **▼** to select VOX level(1-9), then press **menu** to confirm, finally press **exit** to return to standby.

NOTE

- » The higher level of VOX is set, the higher volume is needed.
- » In SCAN and FM radio modes, the VOX function is not available.

Voice Guide (VOICE) --- MENU 9

In standby, press **menu** + **9voce**, the screen displays 

Press **menu** to enter, press **▲** / **▼** to select ON or OFF , and then press **menu** key to confirm, finally press **exit** to return to standby.

NOTE

- » Turn off MENU 9 and MENU 11 at the same time to turn off all the voice prompt if required.

Overtime Alarm (TOA) --- MENU 10

In standby, press **menu** + **10tp** **0**, the screen displays 

Press the **menu** key to access the menu, and after pressing the **▲** / **▼** keys to select the required time, press the **menu** key to confirm, and the **exit** key to return to standby.

TOA has a maximum length of 10seconds, each level corresponding to 1second. OFF: Deactivate TOA.

Beep Prompt Function (BEEP) --- MENU 11

In standby, press **menu** + **10tp** **1m**, the screen displays 

How to Operate

Press **MENU** to enter, press **▲ / ▼** to turn ON/OFF the beep prompt function, then press **MENU** to confirm, finally press **EXIT** to return to standby.

Display Language (LANGUAGE) --- MENU 12

In standby, press **MENU + 1STEP 2SQL**, the screen display 

Press **MENU** to access the function, press **▲ / ▼** to select the desired language, and then press **MENU** to confirm, press **EXIT** to return to standby mode.

Two Options: CHINESE and ENGLISH

Busy Channel Lockout (BCL) --- MENU 13

In frequency mode, press **MENU + 1STEP 3SAVE**, the screen displays 

Press **MENU** to enter, press **▲ / ▼** to select ON/OFF this function, then press **MENU** to confirm, finally press **EXIT** to return to standby.

Note: This function is invalid in cross band repeater or repeater/ receiver modes.

Scan Mode Settings (SC-REV) --- Menu 14

When the receiver is standby, press the **MENU + 1STEP 4TXP**, keys and the screen will display 

Press the **MENU** key to access the menu, and after pressing the **▲ / ▼** keys to select the required set-

ting, press the **MENU** key to confirm, and the **EXIT** key to return to standby. The receiver has 3 scan modes: TO, CO, and SE:

TO: after finding a carrier wave signal, scanning will continue if no operations are carried out within 5 seconds.

CO: scanning will stop when a carrier wave signal has been found, and scanning will continue if the carrier wave signal is lost for 3 seconds.

SE: scanning will stop when a carrier wave signal is found.

NOTE

» Hold on ***SCAN** for 2 seconds to access the scan mode.

Receiving CTCSS settings (RX-CTC) --- Menu 15

When the receiver is in standby, press the **MENU + 1STEP 5R-CTC** keys and the screen will display 
Press the **MENU** key to access the menu, and after pressing the **▲ / ▼** key to select the CTCSS you desire, press the **EXIT** key to return to standby.

How to operate

Receiving DCS settings (RX-DCS) --- Menu 17

When the receiver is standby, press the **MENU** + **1STEP** / **7 VOX** keys and the screen will display

Press the **MENU** key to access the menu, and after pressing the **▲** / **▼** key to select the DCS you desire, press the **MENU** key to confirm, and press the **EXIT** key to return to standby.

DCS: 105 groups of positive code, 105 groups of negative code, ranging from D023N to D754I.

OFF: Deactivate.

CALL/VFTX on Side Key 1 (PF1-KEY) --- MENU 19

In standby, press **MENU + 1 STEP 9 VOICE** kthe screen displays 

Press **MENU** to access the menu, press **▲ / ▼** to select the mode you desire. And then press **MENU** to confirm, and press **EXIT** to return to standby.

Two options: CALL>Selective Calls) and VFTX (receiving on Sub-frequency).

SCAN/LAMP/SOS/TeleAlarm/RADIO/DISABLE on Side Key 3 (PF3-KEY) --- MENU 20

In standby, press **MENU + 2 SQL 0** the screen displays 

Press **MENU** to access the menu, press **▲ / ▼** to select the function you desire. And then press **MENU** to confirm, press **EXIT** to return to standby.

Six options: SCAN,LAMP, SOS, TeleAlarm, RADIO and Disable.

Different operations according to different functions:

SCAN: Activate the scan function:

In standby, press PF3 to access scanning mode.(scan mode can be set via MENU 14-Scan Mode Setting), while press any key to stop scanning.

LAMP: Activate lamp function:

In standby, press PF3 to activate lamp function, while press PF3 again to deactivate.

SOS-CH function

In standby, press PF3, the speaker will prompt alarm after 2 seconds, and the radio will receive alarm tone.

How to Operate

NOTE !

» Each alarm lasts 10seconds, and after 5 minutes, the alarm will re-activate. Press any key to exit the function.

TeleAlarm: Activate remote alarm function

In standby, press PF3, the speaker will prompt alarm and receive ANI ID code +numbers "110".

Press PTT key to exit.

RADIO: Activate the FM radio function

A. Activate FM radio:

In standby, press PF3 to activate FM radio. The screen displays  , press  to access FM radio function to automatically search FM radio. The search will automatically stop when receiving FM radio.

FM radio will be received on the searched frequency.

B. Inputting FM radio Frequency

In FM radio mode, press PF3, the screen display  , hold on  for 2 seconds, the screen displays  .It is OK to input the FM radio frequency.

C. Exit FM radio

Press PF3 again to exit FM radio function.

NOTE !

» When FM radio is active, current frequency or channel is still in standby.

After the signal disappears for 5seconds, the receiver returns to FM radio.

After 5seconds when pressing PTT key to receive the receiver returns to FM radio automaticall .

Working Mode Switch (CH-MDF) --- MENU 21

In standby, press  +   , the screen display 

Press  to enter, press  /  , to select mode then press  confirm , press  it return to standby.

This receiver has two options for the working mode:

1. Frequency mode(FREQ)

2. Channel mode

There are three channel display selections in channel mode as follows;

① Channel (CH) ② Frequency+ Channel number (CH FREQ) ③ Channel name (NAME)

Auto Backlight (ABR) --- MENU 22

In standby , press + , the screen display

Press to enter, press / to select backlight function , then press confirm , press it return to standby.

Always Activate

1S-20S: Set the lasting time of backlight

Stopwatch Timer (SECOND) --- MENU 25

In standby, press + , The screen display

Press to enter, / to select ON/OFF , then press confirm, press to standby.

Using the stopwatch timer:

When this function is ON, press **REC** to start counting, while press any key to stop working . Press **REC** again to re-start counting.

NOTE 

- » Press any key (except **REC**) when the stopwatch stops working to exit the stopwatch function.

Editing a Channel Name (CH-NAME) --- MENU 26

Channel names can only be edited in channel mode, and only the name of the present channel can be edited this operation is ineffective in frequency mode.

In standby, press **MENU** + **2** **6** keys and the screen will display 

Press **MENU** to access the menu, and the first digit will flash (which indicates that this digit is being edited).

Press **▲** to choose the required character, press **▼** to edit the next character, press **REC** to confirm, and then press **EXIT** to return to standby.

NOTE 

- » 1.Channel names can be maximum of 8 characters long.
- » 2.When all 8 characters are empty, the channel will be displayed on the screen as "NO-NAME!"

Memorize Channel (MEM-CH) --- MENU 27

In channel mode or standby, press **MENU** + **2** **7**, the screen displays  Press **MENU** to access the menu, press **▲** / **▼** to select the desired channel order, and then press **MENU** to memorize with a voice prompt. Press **EXIT** to return to standby.

When the receiver is in channel(MR) mode, the parameters(except channel name and scan adding) will be memorized into the channel.

How to operate

In standby, press **MENU + 2 SQL 7 VOX** to access channel memory, the screen displays  , input the desired channel number orderly, and then press **MENU** to confirm.

NOTE !

- » When the selected channel is empty (without any parameter), the characters of the channel number is blue, while the selected channel is with the memorized parameters, the characters of the channel number is dark red.

Deleting a channel (DEL-CH) --- MENU 28

In standby, press **MENU + 2 SQL 8 WIN** , the screen will display 

Press **MENU** to access the menu, press **▲ / ▼** to select the channel you wish to delete or manually inputting the channel number, press **MENU** to confirm and the **EXIT** key to return to standby.

Special Reminder !

- » 1st channel can not be deleted.
- » When the selected channel is empty (without any parameter), the characters of the channel number is blue, while the selected channel is with the memorized parameters, the characters of the channel number is dark red.

CTCSS scanning (SCN-CTC) --- MENU 29

This function scan all the frequencies/channels which with CTCSS setting, in case to confirm if the receiver receives the CTCSS code. When your CTCSS code is not matching with the other member on your group, you can activate this function to confirm the CTCSS code.

In standby, press **MENU + 2 SQL 9 VOICE** , the screen displays 

Press **MENU** to access CTCSS scanning.

Special Reminder !

- » When the current frequency or channel is not receiving any carrier wave signal, then it can not activate this CTCSS scanning function.
- » If you want to scan the frequencies or channels counterclockwise, then you can press **▲ / ▼** or rotate the channel knob to change the scanning direction.
- » When scanning CTCSS frequency, it will show on the screen, you can press **MENU** to save.If the scanned CTCSS is unwanted, then you can press ***SCAN** to continue scanning, until scans the one you wanted.

DCS scanning (SCN-DCS) --- MENU 30

This function scan all the frequencies/channels which with DCS setting, in case to confirm if the receiv

How to Operate

er receives the DCS code. When your DCS code is not matching with the other member on your group, you can activate this function to confirm the DCS code.

In standby, press **MENU** + **3 SAVE** **0**, the screen displays  Press **MENU** to access DCS scanning.

Special Reminder

- » When the current frequency or channel is not receiving any carrier wave signal, then it can not activate this DCS scanning function.
- » If you want to scan the frequencies or channels counterclockwise, then you can press **▲** / **▼** or rotate the channel knob to change the scanning direction.

Mute settings (SP-MUTE) --- MENU 31

In standby, press **MENU** + **3 SAVE** **1 STEP**, the screen displays 
Press **MENU** to access the menu, and after pressing **▲** / **▼** to choose the required mute mode, press **MENU** to confirm, and press **EXIT** to return to standby.

Squelch settings: set the conditions which determine when the speaker shall be turned on, these settings are used during selective calls, group calls and all calls.

The receiver's mute mode include:

QT: When the receiver is set to this mode, all signals on the same QT frequency will activate the speaker.

QT+DTMF: only those signals which both satisfy the requirements of QT and whose DTMF carrier wave signal also match the receiver will activate the speaker in this mode.

QT*DTMF: When this mode is active, only those signals which either meet QT requirements or DTMF requirements will activate the speaker.

Caller ID Code Switch (ANI-SW) --- MENU 32

In frequency mode, press **MENU** + **3 SAVE** **2 SQW**, The screen display 
Press **MENU** to enter, press **▲** / **▼** to select turn ON/OFF, and press **MENU** to confirm, press **EXIT** it return to standby.

Editing Caller ID Code (ANI-EDIT) --- MENU 33

The receiver's Caller ID code is composed of the arabic numerals 0-9: the first digit cannot be 0, and ID numbers can be as short as 3 digits and as long as 6.

In standby, press **MENU** + **3 SAVE** **3 SAVE**, the screen displays 
Press **MENU** to access the menu, and after inputting the required numbers, press **MENU** to confirm, and **EXIT** key to return to standby.

Example 1:editing a 6-digit ANI ID code(123456).

In standby, press **MENU** + **3 SWF** **3 SWF**, the screen displays **ANI-EDIT**

After pressing **■** key, the first digit will flash, then input the required value 123456.

Press **■** to confirm, and press **EXIT** to return to standby.

Example 2:editing a 3-digit Caller ID code(123)

In standby, press **MENU** + **3 SWF** **3 SWF**, the screen displays **ANI-EDIT**

After pressing **■**, if a Caller ID code has been already input, it will be displayed, and the first digit will flash. If no Caller ID code has been input, 101 will be displayed, and the first digit will flash. Input 123 at the same time, press **■** to confirm, press **EXIT** to return to standby.

DTMF Sidetone (DTMF-ST) --- MEUN 34

In frequency mode, press **MENU** + **3 SWF** **4 SW**, The screen display **DTMFST**

Press **■** to enter, press **▲** / **▼** to select the required sidetone mode, and press **■** to confirm, press **■** to return to standby.

Keypad Autolock (AUTOLOCK) --- MENU 35

In standby, press **MENU** + **3 SWF** **5 SW**, the screen displays **AUTOLK**

Press **■** to access the menu, press **▲** / **▼** to select ON(Activate)/OFF(Deactivate), and then press **■** to confirm, press **EXIT** to return to standby.

After activating keypad autolock function, the keypad will be locked automatically without any operation in 15seconds. Hold on **■** for 2seconds to unlock the keypad.

NOTE

» Manually lock:In standby, hold on **LOCK** for 2seconds to lock the keypad, hold on **LOCK** for 2 seconds again to unlock the keypad.

Priority Channel Switch (PRI CH-SW) --- MENU 36

In standby, press **MENU** + **3 SWF** **6 SW**, the screen display **PRICH-SW**

Press **■** to access, press **▲** / **▼** to select ON/OFF. And then press **■** to confirm, and press **EXIT** to return to standby

How to Operate

Repeater Speaker (RPT-SPK) --- MENU 38

In standby, press + , the screen display

Press to access, press / to select ON/OFF. And then press to confirm, and press to return to standby.

Repeater PTT (RPT-PTT) --- MENU 39

In standby, press + , the screen display

Press to access, press / to select ON/OFF. And then press to confirm, and press to return to standby.

Scan Add (SCAN-ADD) --- MENU 40

This function means whether a channel in scanning when in the startup channel scanning, so the function can be set only in the channel mode under the current channel, is invalid in frequency mode.

In standby, press + , the screen display

Press to access, press / to select ON/OFF. And then press to confirm, and press to return to standby.

Note:The function is invalid in cross-band repeater or repeater mode.

Caller ID Code Transmitting Delay (PTT-DLY) --- MENU 42

In standby, press + , the screen display

Press to access, press / to select the time you want. And then press to confirm, and press to return to standby.

This delay time can be set 100~3000ms, total 30 levels with 100ms each.

Caller ID Transmission Mode (PTT-ID) --- MENU 43

In standby, press + , the screen display

Press **menu** to access, press **▲ / ▼** to select the mode you want. And then press **menu** to confirm, and press **exit** to return to standby.

This can be set three methods, BOT (begin), EOT (end), BOTH (begin /end).

Ring Time --- MENU 44

In standby, press **menu** + **4** **1**, the screen display 

Press **menu** to access, press **▲ / ▼** to select the parameter you want. And then press **menu** to confirm, and press **exit** to return to standby.

This ring time can be set 10 seconds, total 10 levels with 1 second. OFF:Deactivate the function.

Scan group A setting (SCG-A) --- MENU 45

Scan group settings are: ALL channel, as well as 1-10 individual scanning groups.

In standby, press **menu** + **4** **2**, the screen displays 

Press **▲ / ▼** to press **menu** to confirm, press **exit** to return.

Note:Scanning group A setting is active in A area.

Scan Group B Setting (SCG-B) --- MENU 46

Scan group settings are: ALL channel, as well as 1-10 individual scanning groups.

In standby, press **menu** + **4** **3**, the screen displays 

Press **▲ / ▼** to press **menu** to confirm, press **exit** to return.

Note:Scanning group B setting is active in B area.

Repeater Tone Setting (RPT-TONE) --- MENU 47

In standby, press **menu** + **4** **7**, the screen display 

Press **menu** to access, press **▲ / ▼** to select the parameter,. And then press **menu** to confirm, and press **exit** to return to standby.

ON: Activate the function

OFF: Deactivate the function

Saving Scanned CTCSS/DCS (SC-QT) --- MENU 48

When the receiver is in CTCSS/DCS scanning, there are 3 saving types to save the detected CTCSS/

How to Operate

DCS from the others to your receiver:

1.Save as your receiver decoder and encoder(ALL).

2.Save as your receiver encoder(ENCODER)

3.Save as your receiver decoder(DECODER)

When the receiver is in standby, press **MENU + 4 TXP 8 WIN** keys and the screen will display

Press **▲ / ▼** press **MENU** , and then press **EXIT** .

Selective Call Code Group Setting (CALLCODE) --- MENU 5

In standby, press **MENU + 5 HOOK 0** , the screen displays

Press **MENU** to access the menu, press **▲ / ▼** to select the desired selective call group number. Press **MENU** to confirm, and the receiver returns to standby.

Reset setting (Reset) --- MENU 51

Functional Parameter Reset(VFO): resets all functional settings to factory default values, but channel parameters are not reset.

Total Parameter Reset(ALL): resets all of the receiver's functional settings and channel parameters to factory values.

In standby, press **MENU + 5 HOOK 1 STEP** , the screen displays

Press **MENU** to access, press **▲ / ▼** to select the parameter you desire and then press **MENU** to confirm.

The screen will display

After the receiver resets(VFO/ALL), it will restart and return to standby mode.

Detailed Instruction for Some Important Functions

All calls, Group calls and Selective calls

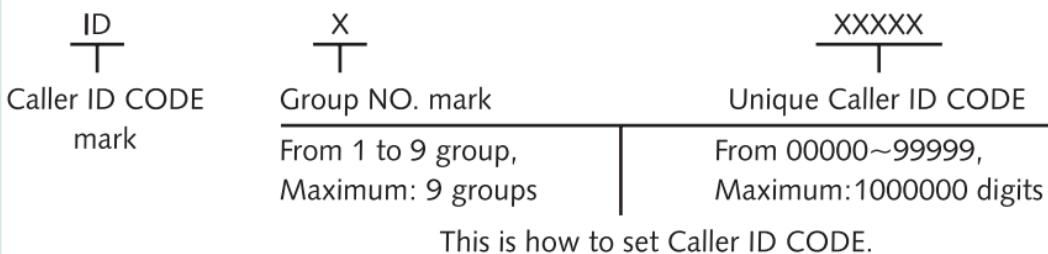

There are Caller ID code receiving , Caller ID code edit and DTMF decoding functions. Without the assistance of the other communication equipments, the all calls,group calls and selective calls are available between the groups.

Before using all calls,group calls and selective calls function, you need to set as followings:

1. Caller ID CODE edit

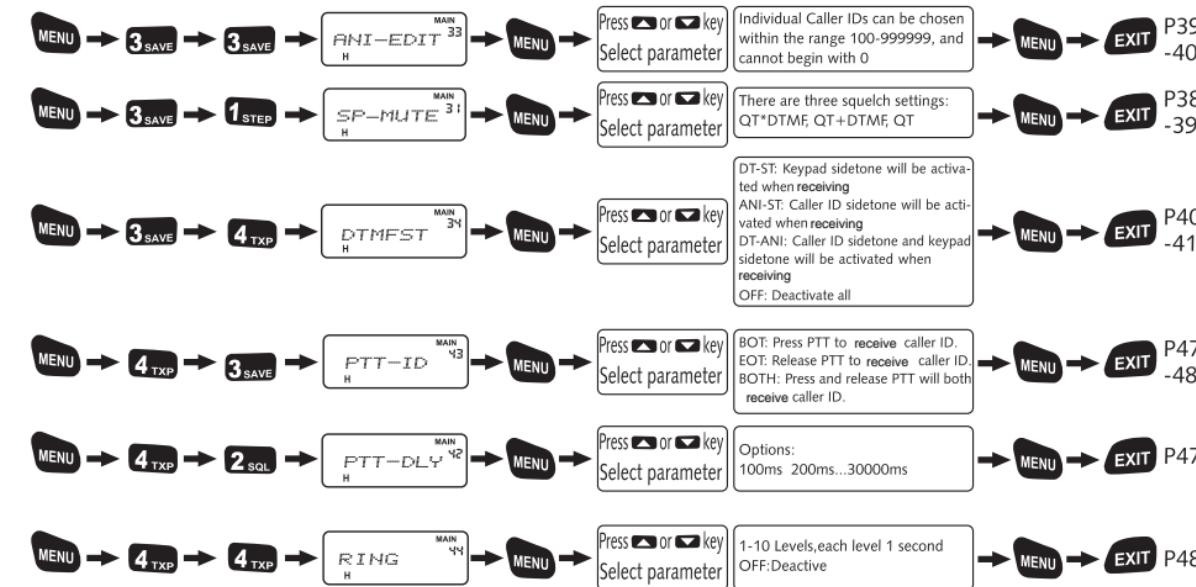

Each transceiver in the same group should be edited a unique ANI ID code.

Caller ID CODE: ID -- XXX(3 digits) ID -- XXXX(4 digits) ID--XXXXXX(5 digits) ID-- XXXXXX(6digits)

NOTE: Caller ID Codes should be different for the receivers in the same group.

Steps are as followings:

NOTE !

» Any receiver in the same group should be with the same frequency point and parameter.

Detailed Instruction for Some Important Functions

a. How to use all calls function:

Hold on PTT key to receive .After receiving Caller ID Code, input ***SCAN + #LOCK** keys directly.

b. How to use group calls function:

Hold on PTT key to receive .After receiving Caller ID Code, input "Group NO." ***SCAN + #LOCK**

c. How to use selective calls function:

Hold on PTT key to receive . After receiving Caller ID Code, input the Caller ID Code of the selective receiver that you want to speak to.

For example, Caller ID Code for the selected receiver is 123456, selective call code for the selective receiver should be 123456 too.

Repeater Usage

1.Repeater PTT Switch (RPT-PTT)

When the receiver is in standby, press **MENU + 3SAVE 9VOICE** keys and the screen displays  RPT-PTT 38

Press **MENU** to access the settings, and after pressing the **▲ / ▼** keys to activate (ON) the PTT receiver

ving, Press **MENU** to confirm, and press the **EXIT** key to return to standby.

2.Repeater speaker switch (RPT-SPK)

When the receiver is in standby, press **MENU + 3SAVE 8WIN** keys and the screen will display  RPT-SPK 38

Press **MENU** to access the settings, and after pressing **▲ / ▾** to activate (ON) the speaker, press **MENU** to confirm, and press **EXIT** key to return to standby.

3.Repeater Setting (RPT-SET)

Accessing cross-band repeater mode: when the receiver is in standby, press **MENU + 3SAVE 7VOX** and the screen will display  RPT-SET 37

Press **MENU** to access, press **▲ / ▾** to select two-way cross-band repeater mode (X-TWRPT) or directional cross-band repeater mode (X-DIRPT). Press **MENU** to confirm. And then press **EXIT** to return to standby mode, hold on **RPT** key for 2seconds, the receiver is to access cross-band repeater.

Exit Cross-Band Repeater: In standby, hold **RPT** for 2seconds, the receiver exit the cross-band repeater mode and access receiver communication mode.

Troubleshooting

Before assuming your transceiver is broken, please check your receiver according to the following table; if the problem persists, you can reset the receiver, which sometimes.

Fault	Solution
Reception prompt remains but speaker is silent	<ul style="list-style-type: none">» Check that the volume knob has been set to maximum.» Please reset CTCSS/DCS to check whether different channels from other group members have been set.» Check whether mute settings are correct.
Keypad is unresponsive	<ul style="list-style-type: none">» Check whether keypad has been locked.» Check whether other keys have been pressed.
Other voices (not from group members) appear in the channel.	<ul style="list-style-type: none">» Please change the CTCSS / DCS code.
In standby, automatic receiving without pressing PTT key	<ul style="list-style-type: none">» Please check if VOX function is active or VOX level is too low.

Fault	Solution
Can not enter scanning mode	<ul style="list-style-type: none">» Please see if the scan group channel, Scan Add function is turned on.
Cannot set up the cross-band repeater	<ul style="list-style-type: none">» Please make sure A/B area is on the cross-band repeaters operating frequency.
Cannot receive in repeat mode	<ul style="list-style-type: none">» Please check to see if the receivers squelch and CTCSS / DCS settings are correct.
